Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 18 April 2006.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1, 3, 4, 7 and 8 are rejected under 35 U.S.C. 102(b) as being anticipated by Sung et al. [US 6,296,375].

Regarding claim 1, Sung et al. discloses an electrical lamp [56] having a vessel [18] emitting visible electromagnetic radiation, a base [12, 16] for securing and making electrical contact with the lamp, a rotary device [50, 51] connecting the base [12, 16] to a housing [46]; wherein the rotary device [50, 51] allows the housing [46] to be rotated with respect to the base [12, 16]; the rotary device [50, 51] has two parts [44, 54], a first part [54] connected to an outer surface of the housing [46], and a second part [44] connected to the base [16, 12] and the first and second parts being latched into one another (figures 1-4).

Regarding claim 3, Sung et al. discloses the first and second parts [44, 54] having a groove and a tongue (figure 4).

Regarding claim 4, Sung et al. discloses a rotation device [50, 51] being rotatably limited to a maximum of 360 degree (figures 1-4).

Regarding claims 7 and 8, Sung et al. discloses an incandescent lamp/a discharge lamp (figures 1-3).

Allowable Subject Matter

4. Claims 5, 6, 9, 10 and 11 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter:

Claims 5 and 11, each of the first and second parts has a stop; the two stops being arranged, at a specific angle of rotation, so as to come into contact with one another between the first and second parts as claimed.

Claim 6, the housing accommodates an electrical circuit for lamp operation which arranged between the vessel and the rotary device.

Claim 9 is dependent on claim 6.

Claim 10, the electric lamp further comprises a sensor being fitted on the second part of the rotary device as claimed.

The limitations discussed above are neither disclosed nor suggested by the prior art of record.

Response to Amendment

5. Applicant's amendment and arguments filed 4/18/2006 have been fully considered but they are not persuasive. The applicant submits that Sung et al. fails to disclose all limitations in the independent claim (the applicant recites all the claim language). However, Sung et al. anticipates all limitations in the claims as described above. In view of that, claim 1 and its dependent claims are deemed to be unpatentable.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Cheng et al. [US 5,667,296] discloses a Christmas lamp including a lamp socket and an outward flange around one end thereof.

7. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
